Why is Crete so attractive in comparison with other places ?

The most important advantages are :

The Climate. The summer is dry, warm and takes up most of the year. The winter doesn't last long and isn't like in Northern Europe where there is a lot of snow and frosty roads. With an average of 310 days of sunshine, spectacular sunrises and sunsets, followed with fabulous stars and moonlight during the nights.

The beauty of the nature and the scenery. Beautiful beaches, majestic mountaintops, caves. Old historical places, untouched and unspoiled villages with character and tradition.

The cost of life. Studies have shown that the cost of life in Crete is 30 % lower than in Cyprus, while Cyprus is already 30 % cheaper than Spain and Portugal.

The low crime rates. According to official data, the crime rate of Crete is only 3 % of the British and 2 % of the Spanish.

Crete is a part of the European Union.

It's part of an **non polluted** country.

The **closest European destination** to the sun.

The **warmth and hospitality** of the Cretan people.

The list can go on and on.....

Crete – a clever investment.

Properties in Crete are in comparison to Spain and the south of France very affordable.

However since Greece has joined the European Union, prices have gone up year after year.

And one thing you can be sure of is that unlike Spain, when you are given a legal building permit by the proper authorities they will never tell you after a couple of years that your permit is revoked and that your property will be demolished. This is something you only hear in Spain. Also your plot is your plot, nobody can just take over a piece of your plot. Your ownership title counts for a 100 %.
